Gold 114 7-8 a 115, Foreign Exchange Steady and Government Bonds Strong.

THURSDAY, April 22-6 P. M. The most important leature in the financial market to-day was the announcement, quietly made, that at last, after much discussion and delay, the pending controversy between the Panama and Pacific Mail companies has been settled satis actorily to both parties. According to the terms of the adjustment Panama is guaranteed \$40,000 per month, a sum that will handsomely increase its ability to pay a large dividend, independent of its South American and European trade, Fuller details of the arrangement will be found else. where. It is, perhaps, too early to speak positively of the effect likely to be produced by the same, for all of the moves upon the chessboard may not be determined upon, but the stock martet during the next sixty days promises to be replete with peculiar interest to parties on both

THE SPECULATIVE PIELD. The prices of Panama to-day were 141, 142, and It was subsequently bid for at 143. Pacific Mail opened at 45, advanced to 45%, declined to 44%, ecovered to 45%, and closed at 44%. As the time for the closing of the books is near at hand it is not unnatural that this stock should be comparalively firm. Union Pacific was exceptionally strong, opening at 74% and advancing steadily to 186%. The end was made at 78%, Wabash was ment looking to its future wellare, advancing to 16% and closing at 18%. Atlantic and Pacific Telegraph continues to be held by former investors, and little stock is to be had at less than 27 a 26% a 26%. News from the steamship Fara-say is awaited with much interest. Ohio and Mis-Masippi rose from 27% to 28%, but closed at the spening price. Lake Shore partially recovered from its depression, and advanced from 71% a 71% to 72%, closing at 72%. St. Paul common finished at 37%, closing at 72%, St. Fact common invised at 37%. Northwest common invised from 42% to 42%, which was the float price. Brie fell off from 31% to 30%, closing at 30%. Western Union sold at 77% a 78 a 78% a 78%. The general tone of the market is for the moment in favor of higher prices, the feeling being based on the present and prospective case in money; yet it is worth while to remember that reactions have been frequent during the past minety days, and when lair profits were available they have been "scooped in" without regard to consequences.
